

EXPERIMENTAL DESIGN

TITAN TV!

THE STRONGEST
TAN (SALUTING)

CENACLE ISLAND
APPEARS TO HAVE
MANY UNDERGROUND
CAVERN-LIKE
CONSTRUCTIONS
CONNECTED INTO
BUILDINGS THROUGH
SOME SORT OF SHAFTS.
THERE ARE TOO MANY
OF THESE TUNNELS TO
COUNT.

SOME SORT OF
LIGHT-BEAM
CAUSED ONE OF
THOSE
BUILDINGS TO
COLLAPSE,
DRAGGING ME
INTO THIS
PECULIAR
SITUATION...

MY ABILITY TO
MAINTAIN MY
COMPOSURE
AND PROVIDE A
CALM AND
COLLECTED
REPORT, WHILE
RISKING MY
LIFE IS
PUSHING ME
TOWARDS MY
LIMIT.

CHIEF,
I LOVE YOU.

EVERYONE,
FAREWELL-

Kelly Jones

#

04

» Episode 1-4

My heart isn't racing, but I'm really nervous.

I have to calm down.

What...

What am I even doing here?

I wonder if she thinks little thoughts like that.

Very interesting.

Umm, is everybody ready?

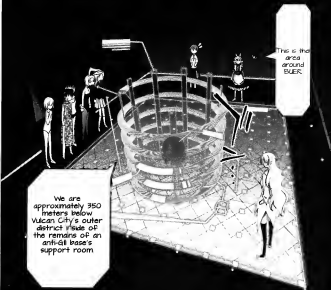

WAR COUNCIL

作戦会議

under-
stood

Clinton, your celebration is too tough!

Clarín's so cool.

So cute-! ♥

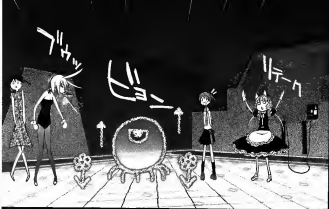

That's just
some
background
information.

Ellen...

The cooling efficiency degrades after every process, therefore we have a few more seconds after every time it fires.

BLUR's post-charged-particle beam emission cooling process time lasts just longer than 180 seconds

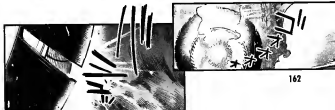

Shinjiro Arima

...the
crucial
point

This
is...

BUER has
gone into
it's cooling
state

うん
あー

Don't
get
hurt
out
there,
okay?

Good
luck.

?

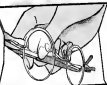

...in the interest of protecting vital information, there is a set radius around BUER in which anyone who goes into it indiscriminately activates a response from its defense systems

The time during which BUER is switching to its cooling mode

We'll be able to do something about it once we manage to get through its defense systems, and manage to call the main body console and use the official key on it

The length of time it's been running will keep increasing, but my hands are tied right now

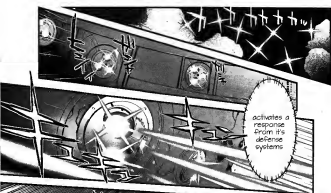

Once we authenticate the key with the Central Nervous Unit, BUER should return to its controlled state

残り164秒

164 Seconds Remaining

a radius
around BUEK
in which
anyone who
goes into it.

activates a
response
from it's
defense
systems

Nene's job...

Then,

With this you'll be able to provide cover for Claron

There is
no recoil
while
firing
either

The theory is
that you can
gain rapid fire
at an
unrestricted
rate by
putting the
system into an
excited state.

The time
between
aiming and
hitting a
target is
almost
zero.

ほん

The
instant
it sees,
it hits.

More
like
fast.

However, to
use that
function you
would need a
high
efficiency 'A'

With the main
sensor working
in parallel with
everything else,
you can aim and
fire onto multiple
targets
simultaneously.

That's
kind of
amazing.

Don't feel
bad about
this, but...

返事

Yes!

Nene-
kun

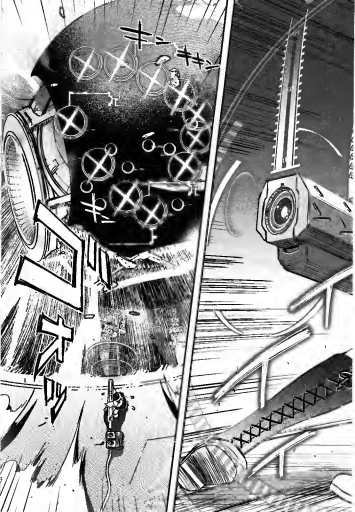

that.

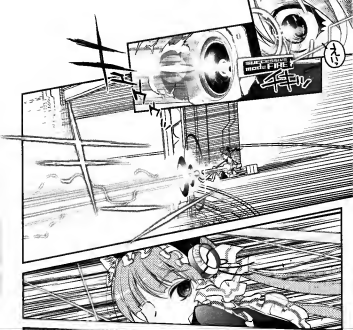

生身の人間用の
装備ではない

IS NOT A
WEAPON
MADE FOR
FLESH AND
BLOOD
HUMANS.

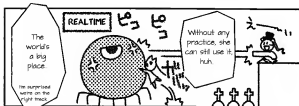

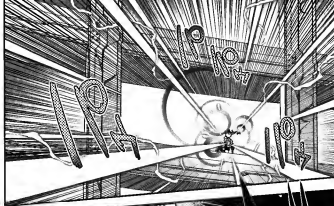

And to
protect
her!

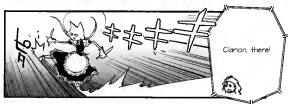

Destroying each
of BUER's
defense
systems to
make way for
Clarion

4w... 4w... 4w

I'm surrounded by spirits!

It's obviously the cutting edge for main consoles.

'That thing' is kind of rude, don't you think?

The hell is THAT thing?

Clanon, hurry up and use the key.

We're running out of time. Don't worry about the small details.

使...
Use...

「かける…」

のか？

Does she
mean, 'put
them on'?
